MADE NARROW ADVANCE.

Contracts Were Restricted by the Pending Government Report.

ALL THEORIES FAVORED THE BULLS

Liverpool Developed a Stronger Undertone and the Trade Looked Better. The Movement Slackened.

Liverpool. 2-64 to 3-64d higher. New York, unchanged to 5 points

higher. New Orleans, 3 to 6 points higher.

Spots-

Liverpool, 1-32d up.

American side, unchanged.

Theoretically the ball could not have asked for more in yesterday's aesalon of the cotton market. Practically there was much room for improvement in his side of the case. The bear trembled as he gazed over the drooping cotton fields that so many accounts held up to view, and to day's government report was all that contained a ray of hope for him on this score. If the document proves as valuable as last month's issue, he may be benefited temporarily, but other considerations make the bureau statement of less importance. The fleurishing portion of the crop is most subject to the havor of an early frost and here is where great fear lies. The deof 71.4 for September and 67 for last October. It will be seen that the government must report a large deterioration to ling proportions. bring the figures down to last year's, and if the late accounts are sustained this will be done, while the probabilities are for a lower estimate. Be this as it may, the signs of a short crop are plentiful freely soon." The demand appeared better on prices that had stood well through terested in having a confirmation of their

the level for the first moments, followed by a gain of a few points when the highest was reached. The range continued about the same as the opening till in the middle of the afternoon a 3 or 4 point loss occurred which was recovered on the last call. In the net result october was unchanged and the later positions went 4 and 5 points higher.

- and 6 points above all sections of the belt. Instead all sections of the belt. Instead all sections of the belt. Instead all sections of the belt.

changed and the later positions went 4 and 5 points higher.

New Orleans began 5 and 6 points above the previous cione. A 1 point gain was made, after which there was a similar decline. The narrow Speciations extended till in the last hour a drop of 2 to 3 points took place. In the net result teleber climbed up 4 points, November 5 and the further deliveries went 3 to 5 points higher. Sales on the American side amount, ed to 6016 bales. Spot questions did not vary.

The mercusent was the lightest of the work. Receipts at all ports for the day week. Receipts and a large yield has been anticipated. Recently recorresponding day of last year. Since it is ports of detectionation have come to and from this section. And it is quite safe to say that the unfavorable weather prevail ing during this month has materially affected the yield. This has been the cold est September for many years, consequently far the same time of last year. Thus far in the consequently the hard been \$22,300 bales, compared with \$13.78 for the same time of last year. Since Friday exports have been produced by warm Septembers and Octobers. This fact alone should cause they was \$307,212 bales, compared with 298,735 for the same day of last year. Haywood & Co., a cotton firm of Liver poet, have removed the veil that still bargs over the face of some of their neighbors and have caught a glimpse of things across the distant waters in a girena.

hors and have caught a glimpse of things across the distant waters. In a circular from Liverpool they say:

"The feature at the hast season in cotton has been the distantion of consumers of cetton, of yarn, of goods and of all the allied products of such goods, not to accompanie any stock, but to reduce all stocks to their lowest point.

"The largest crop ever grown according to the bureau was raised on an area of 22,381,030 acres. In that year we showed how that it was folly to assume that while there had been extensions of acreage throughout America in all produce year by year, ection inone should be at a standerfill, and we gise showed that the acreage under cultivation for cotton was not less than 25,000,000 acres. We gise stated that as the census would be published in two years time, we predicted that the lune in would endeavor to equalize its estimate to that of the new census. This we believe has been done by making two successive increases, each of 8 per cent, consequently we can not make our comparisons of yield compare with last year by adding 8 per cent to that area. There is thus a very wide margin indeed for error, and we feel sure that the public again will be misled, we have always considered that labor in the Esstern States governs extensions of siens. Within the past two years labor available for cotton has greatly increased in cost, and decreased in amount. For the reason given showed the question of its bordoes not so much affect the Western States, as there, it is a matter of climatic conditions. While Liverpool and Luneshir's facing the whater prophesying high prices in order to seel their dear stock at a grout, the Texas planter was still me pricking cotton, and when the speculative increased from the lawer of last February culminated, the truth leaked out that more cotton was available than had been expected. Once bitten, twice shy. The whole cotton world changed from the several rears ago, the want of foreign markets had been used freely without governing with cotton or its equiralient.

ants of the world were large, were supermaking to a fight recession, making the net gain 4
ose from the smallness of the visible
sply of cotton. The course of the marit this past sesson has logically followed
to he course to be expected from this state

[phings.]
Today the world depends upon an early is shown to sell short speculatively and

auperabundance of cetton to enable it to recover the grounds it has well by reason of the meagerness of its stock. It can not severt to short time, as such short time are even the threat of it would cause the consuming markets to become active and such activity would stiffen prices, and short time would cease.

"A consideration of the foregoing in all its bearings leads us to think that the Americans will be able to retain control of their crop so effectively as to counteract all the endeavors of the buyers to beat them down in price until such a time as they have marketed so large a portion as will give them control of the bulance, should such islance not prove much greater than today, appears probable."

New Colones witself

New Orleans wired:

Liverpool cabled: "Better spot demand holds market. Probably continue ten days. as spinners held very small stocks of cot-ton, but home trade peer; we doubt if it is advisable to follow the advance; we are not confident of higher prices."

The range of prices at New York and New Orleans for the active months was

SHORT CROP ESTIMATE.

7,300,000 Bales the Figure for Yield Outside of Texas.

To the Editor of The Post. Meridian, Miss., September 28.-It i now approaching the season of the year when the eyes of all interested in cotton are directed towards anything bearing upon the total yield. The small supplies of Ame-

lear cotton, the prospective improvement sumption, all combleed, render the interest in ultimate yield one of most absorb-ing proportions.

The diversity of opinious regarding the est in ultimate yield one of most absorb-

field causes much speculation as to the true situation, and some reports that are circulated being of such a sensational nature, really give cause for an alarm which snough to shake the coundence in produc would justify the assertion that present tion. It is the ways of the consumer of the product that have been depressing and the product that the tion. It is the ways of the consumer of conditions are truly critical. At the same S small supplies. Expect spriners to buy they have their entire foundation in the fertile bruins of some who are deeply in

errors that had stood well through a month of hard trial on the trade. It is locked as though the "little farmer" had played us skillfully in a game of maneavering me his 70 g adversary" across the water, and was about to who the stakes. Whether the signs be theeritive or not they give all things to the boils, but the pending of the government's statement caused operators to delay and contract values have about to be confirmed, after which we will consider further prospects.

Liverpool effered an imposing front. Sales on the apot reached 15,000 bates and quotations went 1324 higher. The deliveries closed 2-64 off on near and 3-64 up on far menths.

New York opened i ahead on near and 6 to 5 up on distant months. This was the level for the first moments, followed by a gain of a few points when the high est was reached. The range continued as a few admitted, that this crop tion commenced it is should be admitted, that this crop tion commenced or should have commenced in whether the again of a few points when the high est was reached. The range continued

peol, have removed the vell that still hangs over the face of some of their neighbors and have caught a glimpse of things across the distant waters, in a circular from Liverpool they say:

"The feature of the has season in cotton has been the distant waters in a circular from fliverpool they say:

"The feature of the has season in cotton has been the distant waters in a circular from fliverpool they say:

"The feature of the has season in cotton has been the distant waters and of consumers of cotton, of rara, of guests and of all the summistic any stock, but to reduce all stocks to their lowest point.

"The largest crop ever grown according to the bureau was raised on an area of \$2,368,000 acres. In that year we showed how that it was folly to assume that while there had been extensions of acresse throughout America in all preduce year by year, cotton sione should be at a stand still, and we also showed that the acreage under cultivation for cotton was not less than 28,000,000 acres. We glas stated that as the crops can be known and in the site of the crop can be known and in the site of the crop can be known and in the site of the crop can be known and in the site of the crop can be known and in the site of the crop can be known and in the site of the crop can be known and in the site of the crop can be known and in the site of the crop can be known and in the site of the crop can be known and in the site of the crop can be known and in the site of the crop can be known and in the crop water and the crop would contain the constitution of the states cultivation of the says of the crop water of 3,000,000 and a crop and the consumptive requirements. Spineres should look carrefully into the consumptive requirements. Spineres should look carrefully int

When the facts have become patent the rebound will undoubtedly come, as it did after January I. 1900, when the trade realized they had been misled and deceived as to the size of the crop of 1900-01, having been made to believe it was 10.500,000 to 11.000,000 when the actual yield was

11,500,000. It must be understood the writer make It must be understood the writer makes no comments upon the estimates as to the Texas crop, but commits himself only to figures for the States outside not producing over 7,300,000 and is Trank to say that the weather must be exceptionally fine to reach these figures. Much is feared from an early freest and quite rightly too. A heavy killing freest by October 10 to 15 will prove a great disaster, and would call forth a revision of my figures.

A. S. Johnston.

H. & B. Beer's Cotton Letter.

(Special to The Post, New Orleans, October 2.-Liverpool ad ices were somewhat more favorable than oked for, the improvement, according to ables, being due to a better spot demand blch is likely to continue for ten days took of cotton. Home trade, however, is oor and it is not thought advisable to flow the advance. Other correspondents

collow the advance. Other correspondents cable that spinners are simply exchanging poles for deliveries.

Our market respinded by opening 5 to 5 points higher and advanced 1 to 2 points additional on fresh buying. Subsequently, the endlesses of spots forced prices 4 points lower, but shorts covering again counced steadiness, which was maintained until near the close, when realizing occasioned

response from Liverpool this morning, to CORN TOOK THE OPPOSITE COURSE er, our market ruled stendy throughout the session, with values a few points over "Some improvement in the inquiry for yesterday. The coming bureau report respons today and prices are said to be stricted business to some extent and about hardening. New York is looking for a but all the trading was to cover contracts, against 65." many preferring to wait until after the report is issued before venturing further. The consensus of opinion in New York is that about 66 will be given, but sentiment in that market is probably more builts, than elsewhere. If 66 or lewer be given it will be considered builts, and shoul encourage stongs buying to advance processual considerable cotten, both spots and interes, are held walting for an opportunities, are held walting for an opportunities, are held walting for an opportunities, the improvement will held. We believe that in any event the respect will be discredized, whether builts or bearish, and that the market will be unserted if it breaks, and sold freely if it advances. New York closed I to 3 points up. New Orleans 4 to 7 points up. Spots unchanged in all anciences. Idverpool is due to be I as higher tomorrow. The bureau algares will compare with a condition of 71.1 on September 3, 1991; 67 in October, 1809, and 75.4 in October, 1808, The Texas condition hist October was 78.

Cargill & Rehardson.

BEAR PRESSURE ON WHEAT

Cereal Was Depressed All Day, Clos ing Weak and Lower.

Notwithstanding the Bearish Condition Against Which It Had to Fight-Oats Active but Nervous.

Chicago, October 2 .- A continued bear pressure on a dull market depressed when again today. December closing weak 55% ower. December corn closed %214 highe and December outs % up. Provisions cleared from 12% to 32% down

Conditions favored the bears in the wheat plt, the cables were weak, the weather fine and receipts liberal. This started December % to % lower at 60% to 60 and at the outset there was more of the same selling that depressed the market at yesterday The impression gained ground that much of the early selling was to aid corn shorts. Occasional railies on covering helpe. somewhat in bringing prices back, but later in the session a drive by a smalle

inter in the session a drive by a smaller bear clique depressed December to 68%. The cash situation was indifferent, but at the close pront-training by shorts brought liceomber to 68% 600%, to 65% under jesterday. Legal receipts were eleven cars, Minneapolis and Dainth reported 897 cars, making a total for the three points of 918 cars, against 769 last week and 591 a year age. Frimary society were 1.312,000 but hels, compared with 1.078,000 businels a year age. Subpared with 1.078,000 businels a year age. Subpared clearances in wheat and floor equaled 430,000 businels. The scale art reported forty-eight touch taken for export. Corn had a dull market with bearish conditions to fight against, but stendily advanced in the face of the break in wheat takes were weak and the weather perfect the cash situation was dull and there was only a moderate country movement. Lack of offerings, however, had a strengthening effect and December, which opened a triffe weak, soon sold up to 50%. When whe through the provide there was an easier feeling, but never any considerable pressure December closed line, 800% ligher at 50%. Receipts were
